

# 1 5 kw hybrid solar inverter

## 1 5 kw hybrid solar inverter

Anern has 15 years of experience in solar lighting and solar product manufacturing. Anern Industry Group Limited is headquartered in Guangzhou. With a production base of 7,000 square meters, our company has an R& D team of more than 100 people.

Anern 1.5KW 2KVA 2.4KVA patent solar hybrid inverter (AN-SCIO2-Azure series) can effectively improve the utilization efficiency of solar energy, especially suitable for situations where the power grid is unstable or the cost of the power grid is high. This hybrid inverter features a small power of 1.5-2.4kW, which is the best choice for a house of small size.

A 1.5 KW solar inverter is designed to convert DC electricity produced into AC electricity by AC solar panels, which can be used in homes or exported to the grid. It's suitable for smaller solar panel systems typically used in solar panel solutions for homes.

A 2 KW hybrid inverter, on the other hand, combines the functions of a hybrid solar power inverter and a battery inverter. It converts DC electricity from solar panels into AC electricity, stores excess energy in a battery bank, and supplies AC electricity to the home when needed. It also manages the battery charging and discharging process, making it a popular choice for off-grid and backup power applications.

A 2.4 KVA solar inverter, on the other hand, is designed to convert DC electricity from solar panels into AC electricity that can be used in homes or exported to the grid. It's typically used for medium-sized solar panel systems, such as those used for small commercial solar solutions or larger residential applications.

Anern has a professional automated factory and introduces advanced automated production equipment. All products have passed ISO9001, CE, ROHS, TUV and other certifications, and the quality meets international standards. Anern has a professional R& D team to customize exclusive solar energy solutions for each customer.
