

1 5kw inverter with battery price

1 5kw inverter with battery price

The MPPT Solar Inverter maximizes the efficiency of your solar power system by continuously tracking and adjusting to the optimal voltage and current levels. This technology ensures the highest possible energy output, even under changing sunlight conditions. By maximizing solar energy harvest, MPPT inverters reduce power losses, enhance system performance, and improve overall energy savings, making them an essential component for modern solar installations.

The FTS-1500 inverter offers robust performance for users with medium power requirements. With a rated output of 1.5KW, it provides stable, reliable power for residential, commercial or off-grid applications. The inverter has a built-in MPPT solar controller that ensures 99% efficiency in harnessing solar energy. This feature maximises energy production and improves overall system performance.

The FTS-152 supports 12V, 24V and 48V DC battery configurations and is compatible with various battery types, including lead-acid, AGM, gel and smart lithium. Its pure sine wave output ensures stable and clean power, ideal for sensitive equipment. The inverter includes comprehensive protection features such as over-voltage, overload, under-voltage, high temperature and short-circuit protection.

The FTS-152 is equipped with five intelligent control modes that automatically switch between grid priority, energy saving, battery priority, unmanned mode and generator mode according to the specific needs of the system. In addition, the inverter uses intelligent fan cooling, which adjusts fan speed to optimise performance and extend the life of the inverter.

With its high-efficiency MPPT solar controller, reliable protection mechanisms and flexible power options, the FTS-152 is an ideal solution for medium-sized energy systems that require high performance and efficiency.

Experience ultimate mobility and power with the NavaSolar 1.5kW/1.28kWh Trolley Inverter. This innovative 1.5kW/1.28kWh energy storage system is designed for convenience and efficiency.

The NavaSolar Trolley Inverter Lithium Battery features a compact and portable design, making it easy to move and install wherever power is needed. With its high-quality lithium battery, this trolley inverter ensures a reliable and long-lasting power supply for your home or outdoor adventures.

Take charge of your energy independence with the NavaSolar Trolley Inverter. Ideal for off-grid living, camping, and emergencies, this versatile power solution is your ticket to uninterrupted power. With its user-friendly interface and intelligent power management, the NavaSolar Trolley Inverter offers seamless integration with solar panels, providing a sustainable and eco-friendly energy source.

1 5kw inverter with battery price

Choose NavaSolar for your energy needs and experience the freedom of reliable and efficient power. A mobile all-in-one energy storage system, enjoy life without load-shedding.

Trolley inverters are power inverters that are designed to convert DC voltage from a battery bank into AC voltage that can be used to power electronic devices and appliances. They are called trolley inverters because they are often designed to be portable and come with wheels and a handle, similar to a trolley or cart, making them easy to move around. Trolley inverters are commonly used in off-grid or backup power systems, where there is no access to grid power or where the grid power is unreliable.

They can be used in conjunction with renewable energy sources, such as solar panels or wind turbines, to provide a continuous supply of electricity. Trolley inverters come in various sizes and power ratings, ranging from small inverters that can power a few lights and electronic devices to larger inverters that can power entire homes or even businesses. They may also include features such as built-in battery chargers, input/ output ports, and monitoring systems to monitor battery voltage and power output.
