

10kw grid tie solar kit

10kw grid tie solar kit

These 10kW size grid-connect solar kits include solar panels, string inverter, and the racking system for a ground mount. These are complete PV power systems that can work for a home or business, with everything you need to get the system up and running. The kits include hardware components only; does NOT include labor.

The average American uses 920kWh per month. Based on that average this system could reduce your bill to ZERO. If you're an average consumer of electricity (920kWh/month), this 10kW system could probably give you the ticket to electric bill freedom.

25 tier-1 solar panels convert the sun's energy to electricity and come with 25-year warranties. Cut from a single source of silicon, monocrystalline solar panels are more efficient than their polycrystalline counterparts, blended from multiple silicone sources.

Wire, conduit, fittings, breakers, AC/DC Disconnects (if required), junction boxes and a sub panel (if required) can be purchased at any electrical supply shop, Home Depot or Lowes. Our technical support representative will provide a shopping list once your plans are complete.

If you're looking to offset loads with a cost-effective system that combines the benefits of microinverters and string inverters, then this option may be a fit for you.

If you're comfortable with reading and working from plans, diagrams and instructions, our DIY kits can cut your installation costs by as much as 60%. And, yes, you will still receive tax credits.

Another option is hybrid DIY installation where you do some, but not all, of the installation. Purchase the kit and ask for professional help when and where needed. If you reside in one of our service areas, we will be happy to refer you to installers. We can also help you determine which DIY approach is best for you.

Did you know? You can install a solar panel system with some help within a weekend or a few depending on your trade skills. Not up to DIY? Hire one of your trusted contractors to install for you.

GoGreenSolar solar panel kits include a complimentary roof layout, installation support and permit approval guarantees so you don't have to figure it out all on your own.

If you're handy with tools, love learning new skills, or enjoy managing and completing projects, DIY solar installation could be ideal for you. Many DIYers take satisfaction in the process and are proud of the results!

Going DIY can save you \$10,000 or more, depending on system size. Tax credits still apply for equipment,

10kw grid tie solar kit

hardware and any other installation services you utilize.

GoGreenSolar is with you every step of the way during your installation. We're also the only DIY solar company with a money-back guarantee. If your permit isn't approved even after following our instructions we'll provide a full refund*.
