

# 19 kWh photovoltaic battery energy storage

## 19 kWh photovoltaic battery energy storage

With this launch, SunVault is now available in five configurations: 13 kWh, 19.5 kWh, 26 kWh, 39 kWh and 52 kWh. Some of these options include multiple inverters. SunVault configurations with multiple inverters and storage capacity of 26 kWh and more have the potential to power the whole home, so customers don't have to choose between comfort ...

Owing to PV being more predictable than wind, BESS is well suited for application to PVs and provides better results than wind turbines (WT). This study investigated the combination of PV and BESS (PV-BESS). Energy storage in PV can provide different functions [6] and timescale operations [7].

With battery backup and non-backup options available, SunPower makes it easy to add energy storage to any home. Learn more about the benefits of adding solar battery storage to your home power system.

The EVERVOLT<sup>®</sup> home battery system integrates a powerful lithium iron phosphate battery and hybrid inverter with your solar panels, generator and the utility grid to provide your own personal energy store. Produce and store an abundance of renewable energy while substantially reducing or eliminating your electric bill.

The SV-BASE19.5-C battery features a storage capacity of 19.5 kWh and maximum usable energy of 18 kWh. It has the same size as the SV-BASE13-C system and weighs 267 kg.

The two batteries have a storage capacity of 13 and 19.5 kWh, respectively. Both lithium-ion systems use LiFePO<sub>4</sub> as the cathode material and have a round-trip efficiency of over 86%.

The two devices, called SV-BASE13-C and SV-BASE19.5-C, respectively are part of the company's Sunvault series. With this launch, SunVault is now available in five configurations: 13 kWh, 19.5 kWh, 26 kWh, 39 kWh and 52 kWh. Some of these options include multiple inverters, it said in a statement released.

The SV-BASE13-C storage system has a storage capacity of 13 kWh and maximum usable energy of 12 kWh. It measures 164 cm x 71 cm x 36 cm and has a weight of 217 kg.

The SV-BASE19.5-C battery features a storage capacity of 19.5 kWh and maximum usable energy of 18 kWh. It has the same size as the SV-BASE13-C system and weighs 267 kg.

Both lithium-ion systems use LiFePO<sub>4</sub> as the cathode material and have a round-trip efficiency of over 86%. Their nominal internal voltage is 51.2 V and the maximum (AC) continuous backup output current is 28.3 A.

## 19 kWh photovoltaic battery energy storage

Both batteries can operate with an ambient temperature range of -20 C to 45 C and feature an IP54 protection level. The new products come with a 10-year warranty and, according to the manufacturer, can operate for unlimited cycles.

With these new storage sizes and higher power output through multiple inverters, SunVault's modular configuration allows customers to get the storage size they need today with the reassurance that they can grow their system as their home energy requirements change, Sunpower said. The new SunVault sizes will be available beginning early 2023.
