EnSmart Power 's Smart ESS 150/300 is an All-in-one, turn key, modular, compact ESS designed for small and medium C& I loads. The system integrates Battery, BMS PCS, HVAC, fire extinguishing system and EMS systems. All components for battery storage, system operation and grid connection is pre-assembled for a plug and play use can meet the battery storage requirements up to 300kWh in one cabinet itable for various applications such as peak shaving, frequency regulation, EV Charging, Solar + Storage, Micro-Grid, self Consumption Optimization

EnSmart Power 's Smart ESS 150/300 is an All-in-one, turn key, modular, compact ESS designed for small commercial and industrial loads. The system integrates Battery, BMS PCS, HVAC, fire extinguishing system and EMS systems. All components for battery storage, system operation and grid connection is pre-assembled for a plug and play use can meet the battery storage requirements up to 300kWh in one cabinet itable for various applications such as peak shaving, frequency regulation, EV Charging, Solar + Storage, Micro-Grid, self Consumption Optimization

The company was founded in Italy in the 1920s and began its successful history with the production of light oil burners. Today, Riello offers a wide range of products and offers its customers customised product solutions thanks to its great flexibility. These include, among others, commercial storage facilities for installations ranging from 9 to 800 kW. With integrated UPS protection as standard and an emergency power supply as well as many other useful functions, Riello offers its customers highly developed storage solutions for commercial installations.

The battery is charged by the PV system or via the power grid or via a generator / wind power / CHP and other generation systems. The HBS energy storage system operates with optimised efficiency and also ensures integrated UPS protection for all connected loads. The integrated output transformer ensures galvanic isolation between the load and batteries.
