320 kWh smart grid

320 kWh smart grid

Our ChargeBox offers some special features. The versatile elements enable a flexible system setup, allowing you to implement your charging project efficiently and cost-effectively. Our innovative high-voltage technology ensures that our solution is ready for future electric vehicles.

The system solution for battery-buffered ultra-fast charging with up to 320 kW charging power from ADS-TEC Energy offers maximum flexibility. The ChargeBox is the most compact and efficient solution in its class. Due to the most diverse placement options of the system components, there can be up to 300 meter between the grid connection and the charging point.

Thanks to advanced high-voltage technology, ChargeBox is compatible with voltage ranges from 150 to 920 V, making it future-proof and ready for upcoming electric vehicles.

The high-powered Enphase IQ7X Microinverter dramatically simplifies the installation process while achieving high system efficiency for systems with 96-cell modules. Part of the Enphase Energy System, the IQ7X Microinverter integrates with the IQ Battery, the IQ Gateway, and the Enphase App.

The IQ Microinverters extend the reliability standards set forth by previous generations and undergo over a million hours of power-on testing, enabling Enphase to provide an industry-leading limited warranty of up to 25 years.
