470 kWh electricity market

470 kWh electricity market

The Wholesale Electricity Market Portal was launched by the U.S. Energy Information Administration (EIA) in March of 2024 to help users examine and access electricity markets data in the seven Regional Transmission Organizations (RTO) and Independent System Operators (ISO).

The International Energy Agency's Electricity Market Report 2023 offers a deep analysis of recent policies, trends and market developments. It also provides forecasts through 2025 for electricity demand, supply and CO 2 emissions - with a detailed study of the evolving generation mix.

The IEA real-time electricity map displays electricity demand, generation, spot prices, trade as well as CO 2 emissions from more than 50 sources. Data is available historically, as well as daily or hourly, and at country or regional levels. Explore the map to discover visuals and analysis.

Consumption of fuels used to generate electricity. Detailed EIA-923 (and previous) annual and preliminary monthly survey data. By plant and utility/operator. Monthly and annual. Release date: October 28, 2024 |Data from: Monthly Energy Review |Interactive data from: Total Energy Data Browser.

Shown are annual average real time electricity market prices based on data from all locational marginal price (LMP) nodes in 2023. High wholesale electricity prices in ERCOT and CAISO were driven by different phenomena.
