

55 kWh battery system

55 kWh battery system

Deye is proud to present the latest advancements in energy storage solutions: the BOS-G60H and BOS-G60L High-Voltage Battery Systems. Engineered for efficiency, reliability, and unparalleled performance, these systems are designed to meet the diverse needs of modern energy demands. Whether for residential, commercial, or industrial applications, the BOS-G60 series offers a scalable and sustainable solution that integrates seamlessly with your energy management requirements.

The BOS-G60H is a testament to superior engineering, offering a robust energy storage solution with a system energy capacity of 61.44 kWh. Utilizing advanced LiFePO₄ cell chemistry, it ensures safety, longevity, and high performance. With a module nominal voltage of 51.2V and a system nominal voltage of 614.4V, it is designed for applications requiring high energy density and efficiency.

The BOS-G60L shares the same innovative DNA as its counterpart but is tailored for systems requiring a lower nominal voltage. With a system nominal voltage of 307.2V and a module energy of 5.12 kWh, it offers flexibility and adaptability for a wide range of energy storage applications.

Both the BOS-G60H and BOS-G60L are equipped with state-of-the-art features such as a high voltage battery cluster control box conforming to North American standards, offering operational voltages ranging from 120V to 750Vdc. Their robust design includes an ingress protection rating of IP20 and an operational temperature range that ensures reliability under various environmental conditions.

The BOS-G60 series represents Deye's commitment to innovation and excellence in the field of energy storage. Whether you're looking to enhance your home's energy efficiency, power your business operations, or scale up industrial energy storage, the BOS-G60H and BOS-G60L offer the flexibility, reliability, and performance you need. Embrace the future of energy with Deye's BOS-G60 series - where power meets innovation.
