

7 magnet permanent alternator

7 magnet permanent alternator

Cat 4 Neo Core low rpm wind generator permanent magnet alternator PMA My apologies for the lengthiness of this description. My review of the generator sales has led me to the conclusion that most of the current market has to offer is "sales pitch". It...

My apologies for the lengthiness of this description. My review of the generator sales has led me to the conclusion that most of the current market has to offer is "sales pitch". It is my intent to simply show here what we offer, our capabilities, and...

WIND GENERATOR WHITE LIGHTNING 110V 1000W PERMANENT MAGNET GENERATOR
HURRICANE White Lightning Hurricane 1000 Permanent Magnet Alternator/Generator Great for 48 Volt You will need a real wind turbine charge controller...

WIND GENERATOR WHITE LIGHTNING 24V 1000W PERMANENT MAGNET GENERATOR
HURRICANE White Lightning Hurricane 1000 Permanent Magnet 2500 watt instantaneous Alternator/Generator*includes rectifier as...

WIND GENERATOR WHITE LIGHTNING 48V 1000W PERMANENT MAGNET GENERATOR
HURRICANE White Lightning Hurricane 1000 Permanent Magnet Alternator/Generator Great for 48 Volt You will need a real wind turbine charge controller with buck boost...

Hurricane Wind Power Marine Wind Generator Permanent Magnet Alternator PMA Low Wind Made to survive in HARSH environments My apologies for the lengthiness of this description. My review of the generator sales has led me to the conclusion that most of...

Air-Boss 1400 V Series PMA Direct drive permanent magnet alternators for direct drive wind turbines. The useful range of Air-Boss permanent magnet alternators (PMA) overcomes several barriers typically found in wind turbine generators, small wind...

WIND GENERATOR WHITE LIGHTNING 12V 750W PERMANENT MAGNET GENERATOR
HURRICANE White Lightning Hurricane 750W Permanent Magnet Alternator/Generator Great for 12 Volt You will need a real wind turbine charge controller with...

Well this is the culmination of our efforts to bring the very best in American manufacturing to the wind power industry. Designed on the proven Axial Flux Generator design this product is manufactured to the most exacting standards and stringent quality...

Small wind turbines are one of the most adaptable, flexible and easy to use technologies for generating

7 magnet permanent alternator

sustainable and cheap electricity: for this reason market demand is exploding right now. Unfortunately, the market for this application is affected by the lack of industrialised components with a specific designed performance.

In order to satisfy this particular application, MeccAlte decided to fill the gap in the current generator industry and to design a new series of low rpm alternators for wind turbines focused on this new application.

The Eogen series, ranging from 400W to 5kW, has been consequently designed with the latest technology available and the Njorgen series, ranging from 5kW to 20kW, is completing the great success found by the Eogen series.
