

A123 batteries website

A123 batteries website

A123 Systems is a worldwide Leading LiFePO₄ Battery researcher and manufacturer located in United States and has production facilities in China. A123 Systems, LLC develops and manufactures advanced Nanophosphate^{#174}; lithium iron phosphate batteries and energy storage systems that deliver high power, maximize usable energy, and provide long life, all with excellent safety performance.

A123's patented Nanophosphate technology provides this prismatic cell with outstanding cycle life and a very high power output. With a high usable energy range and industry-leading abuse tolerance, this cell delivers excellent performance even under the most rigorous testing. Packaging these light weight cells is easy because of the compact design that's ready for virtually any high power.
