Ankara specific companies and products

AREYLight ensures that lighting units can be controlled remotely without the need for infrastructural change. The solution makes citiesautonomous while reducing expenses, returning on investments and efficiency. Smart units turn into Autonomous Lighting groups with neuralnetwork communication. Their proprietary algorithms allow for affordable efficiency gains on a scale that could not be obtained before

AREYLight is an Artificial Intelligence company for redefine Energy-Tech and conserve electricity usage by ensuring that lighting units can be controlled remotely and efficiently through th...

Our product streamlines and optimizes the operations of businesses that provide field services. Field services encompass a wide range of industries, including but not limited to heating, ventilation, and air conditioning, plumbing, electrical, telecommunications, maintenance, and repairs.

The web program and mobile application assist businesses in effectively managing their field service operations by providing them with a centralized platform for planning, scheduling, dispatching, tracking, and analyzing their field activities.

We are a group of engineers/entrepreneurs with more than 30 years of experience in Aerospace & Defense Ind. from T?rkiye. We believe that All Electrical Lighter Than Air (LTA) vehicles will be one of the future air vehicles.Our company (KUZGUN Ltd.) was founded in 2007 and closed in 2015 (micro start-up company). We are on the edge to establish a new one (KUZGUN Aerospace Inc).

We"ve completed 2 prototypes of Lighter Than Air vehicle concepts: KUZGUN_1 Unmanned Airship & KUZGUN_A1 Tethered Airship (supported by governmental agencies: T?bitak and Kosgeb). Specifications of KUZGUN_1 Unmanned ...

The energy, heating and feed needs of this agricultural and livestock business are generated by the company"s own resources. We market the electricity produced from solar energy to the market. At this stage, we are converting wastewater into agricultural irrigation water, and in the future fractions, we will add new ones to traditional recycling, and we will undertake projects that make a lot of noise on a global scale.We are doing all this to leave a little bit of a beautiful world to future generations.

We manufacture worlds highest tolerance FDM type 3D printer consumables. With 0.01 mm median tolerance, filaments we manufacture are unrivaled when it comes to mechanical and cosmetic properties.

We currently manufacture ABS, PLA, PA, HIPS, PP, TPU, TPE, Semi-Flex PLA and industrial grade biopolymer STH. We are looking to expand our inventory with additional petrochemical and biopolymer materials before the end of the year.

Evreka is a leading SaaS company with the vision of being a part of an improvement process consistently and striving to understand the needs of its customers transparently. Evreka is doing all of these to be always better.
