

Astana energy storage systems

Astana energy storage systems

On behalf of the Nazarbayev University, we are pleased to cordially invite you to deliver a talk at the 12th International Conference on Nanomaterials and Advanced Energy Storage Systems (INESS-2024) organized by Nazarbayev University (NU), Institute of Batteries (IoB), and National Laboratory Astana (NLA).

Your expertise and experience will be an excellent addition to our program, as many of our visitors will look forward to hearing and learning from your work at INESS-2024.

The researchers from different countries will participate and share their vision on progress and problems in materials science, nanotechnologies, ecology, renewable energy and energy storage systems.

The INESS (International Conference on Nanomaterials and Advanced Energy Storage Systems) conference series began in 2013 as a pioneering forum in Astana, Kazakhstan. This annual event quickly established itself as a critical gathering for experts, scientists, and students from around the globe, including nations such as Japan, Korea, France, China, Russia, Canada, the UAE, the UK, Turkey, and Kazakhstan. The conference has been dedicated to exploring the frontiers of renewable energy, materials science, energy storage systems, and nanotechnology.
