Bangladesh electricity rates

Tariff Rate: Effect from January 2023. Retail Tariff Rate of BPDB: Effect from March 2020. Retail Tariff Condition & Miscellaneous fee & Charges: Effect from March 2020.

Electricity Bill Chart 2023. Latest and updated electricity tariff rate (Effective from March 2023) This chart data is issued by Ministry of Power Energy and Mineral Resources of Bangladesh. Official Link To Tariff Last Updated - 29 February 2024

The government increased electricity prices in the country three times last year by 15%. The government recently shared news about increasing the charges on electricity bills for regular consumers. This means that people will now pay an extra 0.34 TK per unit for the electricity they use in their homes and businesses.

Applicable to the electricity service through a single watt hour meter for hospitals, educational institutions, religious & charitable establishments and all classes of consumers other than those specified under category A, B, C, E & J having sanctioned load up to 50 KW.

The electricity invoice serves as a comprehensive record of the power utility companies deliver to their valued customers and the corresponding financial obligation for its usage.

Embedded within this invoice are essential details such as the prevailing meter reading, and the unit-based charge for electricity consumption, alongside supplementary levies like taxation and penalties for delayed remittance.

In the nation of Bangladesh, the issuance of electricity bills is the prerogative of the Bangladesh Power Development Board (BPDB) in conjunction with various distribution entities.

The calculus underpinning the bill's quantum considers the quantum of electricity units consumed, the tariff structure ordained by the government, and any ancillary impositions like fees and taxes.

As the cost of everyday items continues to rise, so has Bangladesh's electricity bill. The government increased electricity prices in the country three times last year by 15%

These changes impact both small-scale users and larger wholesale buyers of electricity in the country. The updated prices officially started in March 2024, as per the government's announcement.

Now, let's dive into the heart of the Electricity Bill Per Unit. The most crucial update reveals an average rise of 5% in charges, equating to an increase to Tk 4.14 for every unit (or kilowatt hour) consumed by regular customers, up from the previous Tk 3.94.

With the fresh pricing regime, agriculture has witnessed a 0.34 TK increment per unit, transforming the cost from the previous 4.19 TK to the current 4.53 TK per unit.
