

Battery component 35 kWh

Battery component 35 kWh

The modular Huawei LUNA2000 system is a high voltage battery solution which is compatible with a wide range of self-consumption Huawei inverters including single and three-phase inverters.

The Huawei 3Ph Inverter plus Luna2000 S0 HV Battery Bundle is made up of 5 kWh modules which can be stacked directly on one another to create a 15 kWh system stack. Another three stacks can be joined in parallel, sitting side by side, to scale the battery system to a total capacity of 60 kWh per inverter.

Established in 2006, Alternergy is one of the UK's longest serving solar PV distributors, supplying high quality and excellent value solar solutions to the trade market.

Supplying very energy-dense cylindrical NCA battery cells to Tesla has been the focus so far, however the company can't be sustainable if it depends too much on a single customer, especially if this customer uses a type of cells that others don't and even intends to produce its own cells someday.
