

Battery lifepo4 3 2 v

Battery lifepo4 3 2 v

Total solution for Portable Power since 1995. Products are designed, assembled & Quality Controlled in USA. All products are shipped from California. Call us at 510-525-2328

The 3.2 Volt 18650 LiFePO4 Battery with a capacity of 1500 mAh is a powerful and reliable rechargeable battery that is suitable for a wide range of applications. With a nominal voltage of 3.2 volts, this battery is designed to provide long-lasting and stable performance.

One of the main benefits of the 3.2 Volt 18650 LiFePO4 Battery is its high capacity of 1500 mAh. This makes it ideal for use in high-drain devices, such as flashlights, portable fans, or power tools, where a longer-lasting source of power is required.

Like other LiFePO4 batteries, this battery is designed with a flat top terminal, which makes it easy to install and replace. It also has a high maximum discharging current of 4.2 A (2.8 C) continuously and 8.4 A (5.6 C) for impulse rate less than 10 seconds, allowing it to deliver high performance safely and efficiently.

The 3.2 Volt 18650 LiFePO4 Battery is also lightweight and has a high energy density, making it a great choice for portable devices. At just 41 grams, this battery is easy to handle and transport, while its compact size of 65mm in length and 18mm in diameter makes it easy to fit into a range of devices.

Another key advantage of the 3.2 Volt 18650 LiFePO4 Battery is its long storage life. Unlike other rechargeable batteries that can lose their charge over time, this battery has a long storage life, which means you can keep it charged for extended periods without worrying about it losing its capacity.

This battery is also designed to provide up to 1000 charge cycles, making it an eco-friendly and cost-effective option compared to disposable batteries. It has no memory effect, so you can recharge it at any time without worrying about reducing its overall lifespan.

Overall, the 3.2 Volt 18650 LiFePO4 Battery with a capacity of 1500 mAh is an excellent choice for anyone who needs a reliable and high-performing source of power for their devices. With its long-lasting performance, lightweight design, high energy density, and long storage life, it is sure to meet your needs and exceed your expectations.

The 3.2 Volt 18650 LiFePO4 Battery is a high-capacity, reliable rechargeable battery that is ideal for a wide range of applications. Known for its durability, long-lasting performance, and excellent safety profile, this battery is a versatile solution for users who need dependable power in devices ranging from portable electronics to larger energy systems. With a capacity of 1200 mAh, this battery provides ample energy, delivering power consistently over time.

Battery lifepo4 3 2 v

One of the primary attributes of the 3.2 Volt 18650 LiFePO₄ Battery is its nominal voltage of 3.2 volts, which provides a stable and efficient power source. This voltage level is particularly useful in applications where a higher voltage is required, making it ideal for devices that demand more robust power.

Unlike many other rechargeable batteries, the 3.2 Volt 18650 LiFePO₄ Battery is known for its long storage life and minimal self-discharge rate. Self-discharge is the natural process where batteries lose their charge when not in use, which can be a problem for users who need reliable power over extended periods.

The low self-discharge rate of this battery means that it retains its charge for long periods, making it an ideal choice for applications where batteries may be stored without use for extended times, such as:
