

# Battery with 10 year warranty

## Battery with 10 year warranty

Federal law requires automakers to warranty EV and hybrid batteries for at least eight years or 100,000 miles. California requires a 10-year, 150,000-mile warranty on EV and hybrid batteries. Still, EV battery warranties vary considerably, especially when it comes to degradation. These are the best electric vehicle warranties in 2024.

Get warranty help with 10-year alarms: If you need warranty service on a 10-year alarm, please email our Support Team or give us a call at 1 (800) 323-9005. Learn about 10-year-battery alarms offered by First Alert and BRK.

Car warranty coverage on an electric car battery covers the replacement cost if your EV's battery fails to perform as it should. Manufacturers offer this protection over a stated period or...

120V AC/DC Smoke Alarm with Sealed 10-Year Lithium Battery. Warranty policy: BRK Brands, Inc., (BRK) the maker of First Alert® brand products warrants that for a period of ten years from the date of purchase, sealed 10-year battery products will be free from defects in material and workmanship.

However, the terms of the warranty can vary. Some automakers only cover an EV's battery pack against a complete failure, while automakers like Tesla, Nissan and Volkswagen will honor the warranty if the capacity percentage drops below a specified threshold, typically 60-70 percent, during the warranty period.

Before purchasing any vehicle, it's best to check the warranty fine print. For example, the Nissan Leaf has a percentage guarantee of approximately 75 percent; however, they use their own measurement units represented in "bars." A full Leaf battery has 12 bars, and the included battery warranty guarantees it for nine bars of charge.

Because battery repairs can be very expensive, it is important to understand the exclusions or conditions that can impact the warranty of an electric car battery.

Hybrid batteries typically last a vehicle's lifetime, with modern vehicles routinely reaching 100,000 to 150,000 miles or more. Accordingly, automakers usually offer a warranty for at least 80,000 miles. In most cases, you can expect to achieve over double that mileage without an issue. Some automakers, such as Hyundai, even offer lifetime warranties. As a result, if you're the owner of a hybrid, you'll likely never have to worry about replacing the battery.

If you're faced with replacing a battery on an out-of-warranty car, there's no need to panic. The cost of a new battery pack continues to decline. Some technicians can even install an approved used battery pack salvaged from a wrecked vehicle, which would greatly reduce the potential repair cost.
