

Belgium solar energy for businesses

ENGIE Fabricom is a world-class manufacturer of induction bends and panels. They offer a range of maintenance, services, and products in the renewable energy sector, specializing in offshore wind, onshore wind, and solar energy. They also provide solutions for road infrastructures and ICT networks.

DEME Group is a company that specializes in offshore wind foundation design and renewable energy projects. They have a dedicated team of professionals who focus on the successful delivery of design-build (EPCI) foundation and balance of plant (BoP) projects. Their vision is to create a sustainable future.

Engie is a company that offers solutions and services for sustainable energy and home automation. They provide information and support for installing solar panels and home batteries, helping customers to save energy and reduce their carbon footprint.

REScoop Vlaanderen is a citizen cooperative promoting renewable energy sources. Through direct citizen participation, people in Flanders can participate in concrete energy efficiency and renewable projects in their neighbourhoods.

Eneco België is a sustainable energy company focused on the production and supply of gas and electricity from renewable sources such as solar and wind. They are a leading player in the renewable energy sector with a significant production capacity in Belgium, the Netherlands, Germany, and the United Kingdom. Eneco aims to provide 100% sustainable energy generated in Belgium through wind turbines and solar panels. They also offer investment opportunities for citizens and the local community through crowdfunding and cooperative participation.

VEB is a vzw organization that provides energy management and consultancy services for the public sector in Flanders. They offer a wide range of solutions for energy efficiency, including energy audits, monitoring, and submetering. VEB also assists in the implementation of energy-saving measures and renewable energy generation, such as solar panels and wind energy. Their expertise helps public institutions achieve significant energy savings and contribute to climate goals.

3e offers bankable expert services for engineering and technical support in the renewable energy sector. They provide data intelligence, digital solutions, and expert services to improve the efficiency and performance of renewable energy assets. Their SynaptiQ platform offers a one-stop solution for development, operational asset management, and analytics. 3e is committed to the digitalization of renewable energy projects and is a preferred technology partner for major investors, operators, and developers.

Enersol is a company specializing in photovoltaic and green energy solutions. They offer a wide range of customized and sustainable energy products and services, using the latest technologies. Enersol aims to

accompany individuals and businesses in their energy transition journey, providing authentic relationships and high-quality solutions.

Viessmann is a family-owned company that develops and produces integrated climate and energy solutions for consumers and businesses. With 12,750 employees in 74 countries, they offer innovative heating systems tailored to individual homes, including condensing boilers, heat pumps, and solar panels. Their goal is to contribute to sustainable energy supply to shape the living space for future generations.

Enfinity Global is a renewable energy company focused on enabling the transition to a Net Zero Carbon Sustainable Economy. With a diverse team of 190 Enfiniter, they develop value-added solutions and acquire operating solar projects. Their commitment to fighting climate change is evident through their 4 long-term strategies and EUR142 million financing for three power plants in Italy.

Advenso is an installation company in Vlaanderen specializing in energy solutions. They offer customized energy solutions including solar panels, home batteries, charging stations, air conditioning, and heat pumps. With a team of energy specialists, they provide environmentally friendly and efficient products that meet the customers' energy needs.

Nuhma is a sustainable and smart energy company owned by 41 Limburg municipalities and the Laakdal municipality. They focus on developing smart technologies and investing in renewable energy projects such as offshore and onshore wind farms, biomass centers, and solar energy projects. Nuhma aims to create a sustainable future for the province of Limburg and actively involves the community in their renewable energy projects. They also work on building a Virtual Power Plant and implementing smart services for cost savings and efficiency.
