

Best solar hot water systems australia

Best solar hot water systems australia

For most homes, the short answer is: yes and yes. A well chosen solar hot water system or a heat pump may cost more to begin with, but for most homes they'll be significantly cheaper to run than a conventional electric or gas system. That's good for your bank account and good for the planet.

In this buying guide, we will provide you with a comprehensive breakdown of solar hot water systems in Australia, including the benefits, what to consider before purchasing, as well as any installation requirements.

Apricus is an Australian company with great hot water systems designed for Australian citizens in Australian climates. Have we made our point? If you want to go local and love the idea of 1,200 resellers across the country for technical support, then an Apricus solar hot water system may be the best option for you.
