

Best trolling motor lithium battery

Best trolling motor lithium battery

Again, a clear first choice – the ExpertPower model is the top-selling Lithium Iron Phosphate battery on Amazon. It has a 10-year warranty, is lighter than its nearest competitor and there is no real difference in price.

The Universal Power Group battery is our clear winner here. All three products are similar in terms of performance and features, so it really comes down to price and warranty. With the cheapest price and a two-year warranty, this product stands head and shoulders above the other two.

Dakota Lithium makes Lithium Iron Phosphate batteries that are purpose-built for boats and kayaks and recreational fishers. These batteries have phenomenal performance and lifespan across a range of different temperatures and use. A clear best choice for kayak fishers prepared to spend on a battery that will last 10 years.

This is the minimum capacity we'd recommend. Many experts recommend a 100Ah battery as a minimum for modern trolling motors, and we'd agree to ensure you get a good day's fishing done and have enough reserve for windy conditions.

Most people go with an AGM battery as it offers the best combination of value for money, weight, and trouble-free operation. Unlike wet cell batteries, they can also be installed upside down, sideways, or in any other configuration (as can lithium batteries).

They are also much better from a maintenance point of view than wet cell batteries as they don't require any topping up (they are fully sealed) and don't carry any risk of spills of acid inside your boat.

Lithium Iron Phosphate batteries are even better in terms of durability and the power-to-weight ratio and would be the number one choice if money were no object, but they are expensive.

The Universal Power Group battery is our clear winner here. All three products are similar in terms of performance and features, so it really comes down to price and warranty.

It has a 10-year warranty, is lighter than its nearest competitor, and there is no real difference in price. This is a great option when a lightweight and superior cold-weather performance is important.

Dakota Lithium makes Lithium Iron Phosphate batteries that are purpose-built for boats and kayaks, and recreational fishers. These batteries have phenomenal performance and lifespan across a range of different temperatures and uses. They also come with a charger. A clear best choice for kayak fishers prepared to spend

Best trolling motor lithium battery

on a battery that will last 10 years.

Well-priced, durable, and reliable, Universal Power Group AGM batteries are a great choice for powering a trolling motor and fit in the Group 27 battery space (see here for a breakdown of dimensions for Group 27 batteries and all other types). A deserved top pick in this class.

The Mighty Max is a popular trolling motor battery that fits a Group 27 battery box. It uses a state-of-the-art, heavy-duty, calcium-alloy grid that provides exceptional performance and service life.
