

Bloemfontein battery recycling

Bloemfontein battery recycling

First Battery's recycling division, Scrap Battery, is responsible for the collection of used lead-acid batteries across South Africa. First Battery Centre franchises act as drop off points for old batteries, while Scrap Battery also offers a collection service for large volumes of batteries.

Scrap batteries are recycled at First Battery's recycling plant in Benoni and are processed to the point that the majority of the components can be used to manufacture new automotive batteries.

Founded in 1992 by Costa and Desiree Airaga, Desco Electronic Recyclers is an established, environmentally responsible and accredited recycler of electronic waste situated in Kempton Park.

Our services are offered to the public, small/medium enterprises (SME) and large corporations. We also provide services to government, educational and medical institutions.

Desco benchmarks against processes across world-wide boundaries, according to sustainable technological innovation and processes, specifically those linked to E-Waste.

Desco helps to protect the integrity of its customers by means of its fast, secure and certified data destruction. We physically destroy old or broken electric and electronic devices so thoroughly that they are completely beyond repair.

This ensures that any data stored on them can never be recovered and it holds true for devices such as Hard Drives, Magnetic Tapes, Laptops, Tablets, Cellphones, GPS units and many more.

All individuals and companies are required to comply with the National Environmental Management: Waste Act 2008. Failure to comply could result in a R10 Million fine, jail time or both.
