Brunei solar thermal energy

Even though they only make up 0.55% of installed capacity at the moment, Brunei wants to increase the share of renewable energy in its generating mix to 30% by 2035. Other ambitious goals include developing and enacting a carbon pricing or tax mechanism by 2025 and assisting multinational oil and gas clients in meeting their net-zero commitments. The development of the nation's clean energy market and the satisfaction of corporate demand for renewable energy are anticipated to be aided by the implementation of the I-REC(E) certificate.

Construction - and infrastructure development in particular - is expected to be a key driver of economic growth across ASEAN from 2021. The bloc, home to some of the world's fastest-growing economies and lowest unemployment rates, faced the novel coronavirus after years of health care infrastructure improvements, with much of the group reporting Covid-19 case-fatality rates below the global mean in 2020.
