

Caterpillar power systems australia

Caterpillar power systems australia

We're not just your average power provider; we give our customers the sustainable power they need. Operating from Australia, we extend our services to Papua New Guinea and the Solomon Islands.

We're all about crafting sustainable power solutions that match your needs. From robust engines to top-notch generator sets, battery energy storage systems and everything in between, our offerings are bolstered by Caterpillar(R), ensuring quality you can rely on.

Whether you're after ready-to-go engines or comprehensive turnkey solutions, we've got the expertise and enthusiasm to make it happen. Our team specialises in integrating cutting-edge Cat Hybrid Energy Solutions, like solar PV and energy storage, to provide you with sustainable power.

In need of short or long-term rental solutions? Look no further. Our range covers power generation, temperature control, and compressed air equipment, offering unmatched flexibility and dependability for your operations.

With sales and rental branches on standby 24/7, we're always ready to lend a hand. Give us a call at 1800 800 441 or explore our interactive map for branch locations and contact details. When it comes to powering your success, trust EPSA to light the way.

As the authorised supplier of Cat(R) power systems in Australia, PNG, and the Solomon Islands, we provide new and used engines, generators, and hybrid energy systems for a broad range of industries.

EPSA specialises in Cat(R) engines for a range of applications and industries, including petroleum and industrial engines, diesel and gas generators, electric power generation, marine engines, oil and gas drilling and offshore production, and critical power equipment.

EPSA's offering includes engines and generators for well stimulation, well servicing, gas compression, land production, power solutions, hazardous location equipment, together with a range of well service pumps, transmissions and electric motors.

As the authorised supplier of Cat engines and power solutions in Australia, Papua New Guinea and the Solomon Islands; EPSA provides trusted Cat power systems, from off-the-shelf engines and generators to full turnkey solutions - FEED, engineering and design, construction, connection, commission, service and maintenance.

EPSA supplies all the Cat power equipment, including diesel and gas engines, diesel generators, gas generators, UPS, switch gear and a variety of components and ancillary equipment.

EPSA is expert in delivering base load, continuous or critical power, prime or standby power, cogeneration, trigeneration, peaking power and a range of biofuel applications from flare gas to land fill gas, from coal seam gas to waste gas.
