

## Clean energy publications

Bord Gáis Energy has acquired Swyft Energy, a solar PV provider in Ireland, for an undisclosed sum. Bord Gáis Energy already operates in the solar PV market: directly to residential customers, and through its partnership with Irish Farmer's Association delivering solar PV to farms across Ireland, helping farmers transition to green energy.

Abu Dhabi Future Energy Company PJSC - Masdar has successfully completed the acquisition of 70% of the outstanding shares of TERNÁ ENERGY SA from GEK TERNÁ SA and other shareholders, and received all regulatory approvals.

The UK Government's nine new offshore wind contracts highlight the global surge in renewable energy. The global wind industry added a record-breaking 117GW of new capacity in 2023, marking the strongest year yet for wind energy growth, according to the latest Global Wind Report from the Global Wind Energy Council.

Solar PV, inverter and energy storage specialist Sungrow has officially opened its Technological Centre for Training and Innovation, aimed at supporting customers in Spain, Portugal, and Southern Europe.

South Korean clean energy firm Plagen has signed a Memorandum of Understanding (MOU) with Latvian company AE Rīsiņģumi for the production of green methanol in Latvia, commencing in 2028.

The Organization of Eastern Caribbean States Commission announced a significant partnership with the International Renewable Energy Agency through the SIDS Lighthouses Initiative and the Global Geothermal Alliance to bolster stakeholder engagement in the region's drive to develop geothermal energy.

EVLO Energy Storage Inc., a wholly owned subsidiary of Hydro-Québec, will develop a battery energy storage system (BESS) with enhanced fire and safety features for Dominion Energy that meet and exceed Dominion's unique safety specifications.

Villara Corporation's AquaThermAire system has been awarded the 2024 Sacramento Inno Award for integrating heating, cooling, and water heating into a single, all-electric solution. Developed in response to traditional heat pump limitations, AquaThermAire was engineered to support California's 2050 carbon-free goals while delivering superior comfort, affordability, and reliability to homeowners.

Pursuing the development of its low-carbon hydrogen ecosystem in the Normandy industrial basin, Air Liquide will invest EUR50 million in a new hydrogen packaging and delivery supply chain to refueling stations along the Seine Axis, to support the acceleration of low-carbon mobility.

Software provider to electric vehicle fleets Synop has announced its selection as the charging management

solution for Bus2Grid's Renew America's Schools Grant, part of a significant initiative aimed at modernising school districts across the US, optimising charging infrastructure for electric school buses.

Renewable Energy Magazine recently had the opportunity to speak with Ben Moore, Communication and Dissemination Manager, to discuss RESPONDENT's pilot project in Athens, Greece.

El Gobierno gallego asegura que quiere aprovechar el "enorme potencial" eólico marino de Galicia, pero pide al Gobierno central "medidas compensatorias" para sectores que, como el pesquero, podrán verse afectados por el desarrollo de parques en aguas gallegas. Lo ha dicho en Viana do Castelo (Portugal) el director general de Planificación Energética y Minas de la Xunta, Pablo Fernández Vila, en un acto sobre eólica marina patrocinado por Repsol.
