

Democratic republic of the congo energy conservation

Democratic republic of the congo energy conservation

The Democratic Republic of the Congo submitted its revised NDC in 2021. The country commits to an unconditional emissions reduction target of 2% and a conditional target of 21% by 2030. The revised NDC covers the agriculture, forestry, health, coastal areas, energy, and waste sectors. The estimated cost of NDC implementation is USD 25.6 billion for mitigation actions and USD 23.08 billion for priority adaptation measures.

The NDC Partnership's Knowledge Portal helps countries to accelerate climate action by providing quick and easy access to data, tools, guidance, good practice, and funding opportunities.

Sign up for the NDC Partnership monthly newsletter and receive updates on our country work, thematic initiatives, knowledge tools and resources, upcoming events and more.
