

Dodoma power outages

The reasons may be different: from planned technical works to emergencies in Dodoma Region. We try to provide information promptly so that you are aware of current events.

In the case of planned works, outages are carried out to ensure the reliability and safety of the power grid. These works are usually planned in advance and we will notify you so that you can prepare. Emergency situations usually occur suddenly due to various factors such as unfavorable weather conditions or damage to power lines.

You can find the current schedule on our website. There you will find detailed instructions and exact times of outages in Dodoma Region. Our website is regularly updated to provide you with the latest information about upcoming outages. This allows you to prepare in advance and minimize the inconvenience of being without power.

As you browse the schedule, you'll also find tips on how to prepare for outages and safety advice. We understand how important the stability of your electricity supply is to you, so we strive to provide the most accurate and useful information possible.

If you want to know when the electricity will be switched on in, you can find the latest information on our website. We publish outage schedules as well as updates on unplanned outages to keep you up to date.

DAR ES SALAAM: The Tanzania Electric Supply Company Limited (TANESCO) has announced a system failure at the Ubungu II gas-fired power plant resulting in a power outage in some parts of the country.

A statement issued by the company on Tuesday stated that the system failure has caused a shortfall in electricity production for a total of 268 megawatts in the electricity transmission system and plunging some areas in the regions into

"Efforts to rectify the problem are ongoing and every four hour, we will inform our customers on the progress to resume the power supply to its routine base," read part of the statement.

MOROGORO: DEPUTY Prime Minister Dr Doto Biteko, who is also the Minister for Energy, has underscored that there is no load shedding in the country, alluding the weekend outage in several areas to challenges arising from infrastructures including water penetrating into some facilities.

"The power rationing has decreased a lot and there is no shortage of power...power outages are caused by other challenges including rain destroying some electricity infrastructures," Dr Biteko said.

Dodoma power outages

He made the statement at Kidatu Hydroelectric Power Station in Kilombero District, Morogoro Region yesterday, while inspecting the ongoing efforts to remove water that penetrated the facility. Advertisement

On Sunday night, most areas in the country experienced power outages due to a technical hitch in the water level control system at the Kidatu Power Plant, which in turn failed to block the large flow of water entering the facility.
