

Double ev car charger

Double ev car charger

Easily reaching parking spaces from a wall or pedestal with its dual 25 ft charge cables, the HCS-D50 splits electricity between two vehicles with up to 20 A each when two vehicles are charging, and up to 40 A when one vehicle is charging. Installed on a 50 A circuit, it's an ideal way to provide more charging options while helping minimize electricity costs.

A universal charging station compatible with any EV sold in North America, the HCS-D50 can be installed indoors or outdoors and comes with over-molded, impact-resistant rubber J1772 connectors and a 5-year limited warranty for added peace of mind.

The plug-in HCS-D50 is a reliable 40 A Level 2 EV charger that can charge two vehicles on one circuit at the same time. With ruggedized design and a NEMA 14-50 plug for easy installation, it can provide up to 38 miles of range per hour with one vehicle plugged in, or up to 19 miles of range per hour with two vehicles plugged in.

A universal charging station compatible with any EV sold in North America, the HCS-D50 also features over-molded, impact-resistant rubber J1772 connectors, can be installed indoors or outdoors, and comes with a 5-year limited warranty for added peace of mind.

Unfortunately, Enphase's at-home EV charger installation services are not yet available in your area. You can [click here](#) to browse electricians with EV charger expertise.

Installation services are available for a single installation site. If you'd like to get multiple EV chargers installed at different addresses, please complete a separate order for each address. To continue this order, please reduce the charger quantity or remove the install service from your cart.

Introducing our Dual Wall Mounted Charger - the ultimate solution for businesses and households embracing the electric revolution. This innovative charger features both a Type 2 cable and a universal socket, providing unparalleled flexibility for all your charging needs.

Designed to future-proof your home, the EDC01 powerfully splits its 7.4kW output between two vehicles; When just one vehicle is plugged in, the full 7.4kW charge is dedicated to that car, optimising charging efficiency.

Double ev car charger

Here's the exciting part – the EDC01 is the most affordable dual charger in the UK! That's right, cutting-edge technology without breaking the bank.
