By installing our Solar Photovoltaic (PV) panels your home can generate clean, green renewable energy from daylight - a free and natural resource. Calculate your savings with YourRetrofit.ie.

Switching to a smart meter plan is the natural next step. It doesn't have to be a hassle, and we're here to help you find the best plan for your lifestyle. With a range of options, there's a smart meter plan that's perfect for you.

Our most popular plan to start your smart meter journey, our 24hour plan lets you keep the same flat rate (day and night) as your previous standard meter plan, so you don't need to worry about timing your electricity use. Ideal if you're working from home during the day, our 24hour plan is hassle-free and includes personalised electricity insights, helping you take control of your energy usage.

Ideal for those who can adjust their energy consumption, this time-of-use plan offers cheaper nighttime rates and a super low Night Boost rate from 2am-4am. Rates are divided into three time bands:- Day: 8am to 11pm- Night: 11pm to 8am- Night Boost: 2am to 4am Perfect for EV drivers who charge at night and homes with a heat pump. Make small changes like showering before 8am or running appliances at night to save significantly. This plan also provides personalised electricity insights.

This time-of-use plan provides unlimited free electricity between 8am and 11pm on either Saturday or Sunday every weekend. Just pick a day that works for you. Ideal for busy families or those who prefer to do chores like washing on a day where it is free to do so. Enjoy a flat unit rate for the rest of the week, so you don't have to worry about peak times.- Saturday or Sunday: Free from 8am to 11pm- Rest of week: Flat rate (day & night) This plan also comes with personalised electricity insights to help you create good energy habits.

Suited for those who want to save by reducing energy during peak hours (5pm - 7pm) or when renewable energy is being generated which is good for the national grid. This plan offers cheaper nighttime rates and splits your electricity rates into three time bands.- Day: 8am to 11pm- Peak: 5pm to 7pm- Night: 11pm to 8am This plan also comes with personalised electricity insights to help you create good energy habits.

All of our Home Electric+ plans come with advanced analytics in your online account. Here you can see detailed information about your usage to find out when you're using the most electricity. You can even see what appliances are using the most energy and discover ways to use less with personalised advice.

As well as Home Electric+, we also have time-of-use plans that are cheaper when your home uses more

Electric ireland electricity rates

energy. If you are not sure which plan is right for you, we recommend you start with Home Electric+ plan as time-of-use plans are most suitable for those who can change their behaviour.
