

Electric vehicle charging st john s

Electric vehicle charging st john s

We've added 38 electric vehicle (EV) chargers to Newfoundland and Labrador's expanding network. Each takeCHARGE charging site have a Direct Current Fast Charger (Fast Charger) and an ENERGY STAR(R) Level 2 charger. You can go further with more charging options than ever before.

Most charging is typically done at home, but there are a growing number of places to charge your EV on the go including the takeCHARGE Electric Vehicle Charging Network. You'll find stations conveniently located near amenities such as shopping, restaurants, and accommodations. It's a great time to hit the road in your EV!

The ChargePoint app is available for download on both iPhone and Android devices. Click [here](#) to learn about using tap to charge with the ChargePoint app. The app can also help you find available stations and can notify you when a station opens up.

Make sure you ask for a free ChargePoint card when signing up for your account. A physical card is good to have as a backup if you ever find yourself without a phone.
