

Electric vehicle policy san salvador

The government, recognizing the dual benefits of reducing dependency on fossil fuels and curbing environmental pollution, has introduced policies and incentives to encourage the adoption of electric vehicles, especially as they released the approval on May 20, 2021, for using electric cars.

On May 20, 2021, the Government of El Salvador published the approved Law No. 738 for electric mobility. The main purpose of this law is the promotion of incentives to import and to use electric and hybrid vehicles in the public and private sector. Under this regulation, a 0% custom duty is established for electric and hybrid vehicles and ...

Electric Mobility Gains Traction in El Salvador. Key players from both the public and private sectors convened at the country's inaugural conference on green mobility in El Salvador, addressing challenges and opportunities in this domain.

El Salvador is rapidly expanding its network of electric vehicle (EV) charging stations, with over 20 locations now open to the public. While most of these stations are concentrated in Greater San Salvador, the network is gradually reaching other areas of the country. For EV owners, the worry of finding a charging station during long trips is ...

On February 5th, the president of El Salvador, Nayib Bukele, secured re-election with 85% of the votes. From the electromobility sector, it is pointed out that there is much potential, but also much to be done alongside the Assembly and the Government.

Key players from both the public and private sectors convened at the country's inaugural conference on green mobility in El Salvador, addressing challenges and opportunities in this domain.

A platform for dialogue, sharing experiences, investment opportunities, and business prospects surrounding electric mobility unfolded in San Salvador during the first Electric Mobility Congress, spearheaded by the Electric Mobility Association of El Salvador (Asomoves).

Beatriz Navas, Executive Director of Asomoves, elucidated that discussions delved into the nation's legislative landscape alongside the supply and demand dynamics crucial for the optimal development of ecological mobility.

<<Our expectation is the dissemination of knowledge, showcasing the offerings available in the country and the direction we're heading towards. Additionally, learning from the experiences of neighboring countries like Guatemala, Costa Rica, and Colombia,>> Navas added.

Furthermore, she emphasized that the event served as a catalyst for expanding the array of electric vehicles and accessories. <<We anticipate an increase in offerings; we are introducing companies from Costa Rica and Guatemala to El Salvador, presenting chargers and vehicles,>> she pointed out.

In parallel, Daniel ?lvarez, the Director-General of the Directorate General of Energy, Hydrocarbons, and Mines (DGEHM), asserted the Central Government's support for initiatives aimed at enhancing the quality of life for Salvadorans.

<<From the DGEHM, we are committed to initiatives ensuring sustainability for all Salvadorans by supporting the introduction of electric mobility as a means to guarantee quality of life and fulfill our environmental commitments. We will continue walking alongside all productive sectors towards a future brimming with opportunities and development for the country,>> ?lvarez emphasized.
