

Electric vehicle range podgorica

Eco-conscious travelers and business enthusiasts landing at Podgorica Airport are often thrilled to discover that electric car rentals are readily available. These electric vehicles (EVs) provide a host of benefits, not only in terms of environmental impact but also in fuel cost savings. Additionally, they offer a unique, smooth, and quiet driving experience that further enhances a visit to Podgorica.

The Toyota Prius Hybrid seamlessly blends efficiency, style, and eco-consciousness, making it a popular choice among visitors at Podgorica Airport Car Rental. This innovative vehicle is offered by GREEN MOTION, a company known for its dedication towards environmentally friendly motoring.

The Toyota Prius Hybrid is more than just a car; it's a statement. The model stands as a testament to Toyota's commitment to reducing carbon footprints. The Prius Hybrid is powered by both a traditional internal combustion engine and an electric motor, making it an ideal vehicle for those aiming to balance performance and sustainability.

This remarkable hybrid car boasts a sleek, aerodynamic design, ensuring optimal fuel efficiency and a quiet ride. Its regenerative braking system further enhances its eco-friendly credentials by capturing and converting energy during braking into electricity, which recharges the battery. This feature makes the Prius Hybrid particularly suitable for the stop-and-go traffic often found in urban areas like Podgorica.

Moreover, the Toyota Prius Hybrid doesn't compromise on comfort or safety. It offers ample interior space, advanced safety features, and a user-friendly infotainment system, ensuring a comfortable and enjoyable driving experience. Its nimble handling and compact dimensions make it well-suited to navigate through the narrow streets of Podgorica's old town and maneuvering in tight parking spaces.

Renting a Toyota Prius Hybrid from GREEN MOTION allows customers to experience the benefits of cutting-edge hybrid technology. It's an excellent choice for those looking to minimize their environmental impact while enjoying their visit to Podgorica.

In a world where environmental consciousness is becoming increasingly crucial, driving an electric vehicle like the Toyota Prius Hybrid is a positive and impactful choice. By renting an EV at Podgorica Airport, travelers can contribute to a greener future, save on fuel costs, and enjoy a unique driving experience. It's a win-win situation for both the individual and the environment.

So, the next time you're in Podgorica, consider an electric car rental for your transport needs. Not only will you get to explore the city in comfort and style, but you'll also be doing your part to keep Podgorica, and the world, a little greener.

Electric vehicle range podgorica

20 September 2019 -The first charging point for electric vehicles has been put into operation in Podgorica. It is placed in front of the Podgorica Assembly, at the crossroads of Njegoševa Street and Vučedolska Street, and it is first of the three charging points planned for the capital. Usage will be free of charge during the first year.

The permanent representative at United Nations Development Programme to Montenegro Daniela Gasparikova stressed that the first public charging point for electric vehicles would boost further development of charging infrastructure across the country.

"Two more charging points will be installed in Podgorica by the end of Oct. and eleven in total by the end of the year," said Gasparikova reports Cafe del Montenegro.

"The Montenegrin transport system currently accounts for 20 per cent of the national greenhouse gas emissions. If pollution by emissions keeps increasing in this way, estimations say it will make up to 30 per cent of the national greenhouse gas emissions," representative at United Nations Development Programme to Montenegro Gasparikova emphasized.
