

Electric vehicles evs uruguay

While key EV automakers have demonstrated a keen interest in Uruguay's EV market for the sale of passenger EV's, there are relatively few EV brands in the market. Most notable is the Chinese EV automaker, BYD, which has a long-standing relationship with the Uruguayan government. Initially, BYD's role was limited to the electrification of Uruguay's taxi fleet through the delivery of 20 BYD e6 taxis in 2017. The success of this initial phase led to BYD expanding its fleet size in 2020 by introducing 50 more e6's to the taxi fleet and 20 electric buses.

BMI has a 40- year track record of supporting investors, risk managers and strategists. We help them identify opportunities and quantify risks in markets where reliable information is hard to find and difficult to interpret. This includes in-depth insight and data, and high frequency geopolitical risk indicators.

CreditSights enables credit market participants to manage financial risk better with independent credit research, global market insights, covenant analysis, and news, distilling market noise into actionable investment ideas.

Sustainable Fitch delivers human-powered sustainability Ratings, Scores & Opinions, as well as Data & Research to serve the needs of fixed income investors. Our specialists uniquely deconstruct the complex issues of E, S, and G globally.

With Uruguay's commitment to becoming carbon neutral by 2050, they wanted to tackle transport as their "second energy transformation". The government focuses on the introduction of green hydrogen for long-distance heavy transport and the promotion of electric mobility. Their first stage of transition was the country's generation of its electricity from renewable energy.
