Electricity port moresby

PNG Power Ltd (PPL) is a fully integrated power authority responsible for generation, transmission, distribution and retailing of electricity throughout Papua New Guinea and servicing individual electricity consumers.

After 15 years, the National Government and its Chinese partner PNG Hydro Development Limited formally launched the Edevu Hydropower Project located along the Brown River area outside Port Moresby.

The company PNG Hydro Development Limited has invested K650 million in the project which is one of Central Province's biggest assets that will supply electricity not only to Port Moresby but the whole Southern region in the near future.

The government has partnered with the developer of the project by way of K120 million (US\$34 million) for a 132KV transmission line from Edevu to Port Moresby which is already under construction, on top of the K650 million (US\$184 million) spent by the company.

PNG Hydro Development Ltd managing director Allan Guo said it took them almost 15 years to reach the launch of the project and this was possible through the good relationship and discussions they had with the landowners of Edevu.

Marape said it's a wonderful reflection of an investor, who saw this opportunity thousands of miles away, and had faith in PNG. He said Edevu landowners had done, by going into partnership with a foreign investor, was a good example for traditional landowners in the rest of the country.

You (landowners) own 97 percent of land rights. My Government, as governments of past, and any government into the future, will not break that right you have. It is your inherent, God-given right to your land.

Also a growing population places a huge demand on power uses which results in overloading. The PNG Power Limited has also raised concern in the past about illegal power connections.
