

Electricity rates namibia

Time-of Use Tariff Schedule: The day light saving in Namibia is not consistent with the respective low demand season and high season times. The respective seasons refer to Namibian time in high demand season and South African time during low demand season.

Electricity Tariffs. City of Windhoek electricity tariffs are approved in accordance with section 27, subsection (2) of the Electricity Act of 2007. Tariffs are reviewed on annual basis and approved by Electricity Control Board for implementation.

small power users tariff 2021/22 tariff 2022/23 large power users tariff 2021/22 tariff 2022/23 net metering avoided cost - c/kwh 112.00 125.47 net metering avoided cost - c/kwh 112.00 125.47 ... prepaid rates domestic commercial postpaid - re-distributors, commercial, water pumping, mining, farmers, farms additional, agriculture, plots ...

The suite of electricity tariffs at Erongo RED is designed to cater for a range of electricity consumption profiles. Where a customer implements a change in plant operation that alters the electricity consumption profile, it may be necessary to migrate to alternate tariff structures to avoid unnecessary electricity charges.

Erongo RED also works closely with various large power users to provide advice on energy efficiency matters with the intention of helping customers to attain high levels of energy efficiencies within their industrial unit.

Network Access Charge (NAC): The network access charge should be the highest kVA that the customer expects the utility to be in a position to supply. The NAC is a tariff component that is fixed on an annual basis and is charged as a Charge N\$/kVA on the greater of the Notified Maximum Demand or the actual demand.

Notified Maximum Demand (NMD): is the maximum demand notified in writing by the customer, which the customer requires in order to be in a position to demand and remains in force for a period of one year. **Service Charge:** is a fixed charge payable per account to recover service related costs.
