

Enerdrive lithium batteries for caravans

Enerdrive lithium batteries for caravans

The name Enerdrive has been part of the Australian electrical landscape for nearly 19 years. Starting as Advance Trident Limited in 2003 and predominantly servicing the marine industry, ATL saw the huge growth potential in the mobile and recreational vehicle market soon after. In 2008 with a management buyout, ATL Limited morphed into Enerdrive with its current owner Chris McClellan.

Today, Enerdrive is owned by Dometic. Enerdrive still design, manufacture and source world class products from leading edge companies like Delta Q, Morningstar, Blue Sea Systems, TBS Electronics & Xantrex.

Enerdrive embarked on its own "Brand Identification" program some 5 years ago and started private labeling products for the Australian market. These included our eLITE & ePRO battery monitors, Enerdrive lithium battery systems, Magnasine Inverter/Chargers, Dual Battery kits & VSR relays. With the success of these items in the marketplace, we added more lines to this portfolio including off grid fixed and folding solar panels and regulators, inverters & DC2DC converters.

In recent times Enerdrive has embarked on its own manufacturing program. We saw the need to control our own destiny and produce hi-end products that the Australian marketplace was demanding. This program has led to Enerdrive manufacturing our own range of ePOWER AC battery chargers & DC2DC battery charger along with our Lithium battery systems.

Along with our own branded products, Enerdrive are the largest stockist of Blue Sea electrical installation equipment in Australia. This product range is engineered to withstand the demanding applications in marine & mobile electrical systems. In the early days, Enerdrive were a significant player in the on-grid solar industry. As time moved forward, Enerdrive found that the business was better suited to the off grid/standalone arena, so a distributorship alliance was formed with the world leader in off grid solar controller technology, Morningstar.

Enerdrive carry large stocks of the Morningstar product range and are constantly working with Morningstar to produce specific charging algorithms to suit the latest battery technology including Lithium. With other significant national distribution rights such as Delta Q, TBS Electronics & Xantrex, Enerdrive have you covered in all industries.

Looking to purchase an Enerdrive lithium battery system? Our customer service team is here to help! We work closely with all industries that require independent, mobile or off grid power solutions including:

We highly recommend checking out our Enerdrive lithium battery bundles which range from a simple battery and DC charger bundle, up to a full installation kit including a battery, DC charger, AC charger, inverter and solar panels! Some of our favourite bundles include:

Enerdrive lithium batteries for caravans

Available in 12V 100Ah, 125Ah, 200Ah, 300Ah and 400Ah capacities and 24V 100Ah, 150Ah & 36v 100Ah, the ePOWER B-TEC lithium battery is designed and intended for use in deep cycle applications.

Enerdrive | Dometic B-TEC LiFeP04 12v 200Ah Slimline Lithium Battery
The new 200Ah ePOWER B-TEC Slimline lithium battery is designed and intended for use in deep cycle applications where a single battery is required that meets the amp hour capacity.

Smart Phone Monitoring System
The Enerdrive B-TEC G2 battery incorporates wireless Battery Monitoring Technology. By downloading the Android(TM) or Apple(R) app to your smartphone or tablet device, you can monitor the following information;

Battery Management System
The battery is also equipped with an internal Battery Management System that can monitor and optimise each Prismatic cell within the battery during normal operation. It will protect the battery pack from over charge, over discharge, over temperature & short circuit. The BMS helps to ensure safe and accurate operation of the battery. Please note that a fully discharged battery (BMS is off) requires charging within 14 days to avoid cell damage.
