Energy efficiency pretoria

The Energy Systems Group in the Department of Electrical, Electronic and Computer Engineering, University of Pretoria, is an active research group from the Centre of New Energy Systems (CNES) and the National Hub for Postgraduate Programme in Energy Efficiency and Demand Side Management (EEDSM Hub).

Enterprises University of Pretoria deploys multi-disciplinary teams of experts that provide innovative research and advisory services. Most of our solutions are customised and draws on the latest best practice as informed by science and evidence.

Our ability to engage with and solve current real-world challenges on a day-to-day basis makes us a business partner of choice - both locally and internationally.

The CSIR's Energy Research Centre provides fact-base expertise and essential research infrastructure to address South Africa's growing energy needs, and maximise the associated industrialisation opportunities for new products and services.

The centre provides thought leadership, innovation and capacity building to address the two main energy imperatives of energy efficiency and cleaner energy. The centre responds directly to the challenges identified in the National Development Plan by providing unbiased decision support to solve the long-term sustainable energy needs of South Africa, while concurrently addressing issues such as carbon dioxide emissions, water use, uncertainty, localisation and regional development.

Research groups: South Africa is well positioned to be among those regional and global leaders who successfully transition to energy systems in which renewable electricity forms the primary energy carrier.
