## Energy savings hub 2023

Online One-Stop Shop Provides Homeowners, Renters, and Drivers Key Information About Clean Energy Rewards Available to Slash Energy Bills, Thanks to President Biden's Investing in America Agenda

On Aug. 16, 2022, President Biden signed the landmark Inflation Reduction Act (IRA) into law. The law includes \$391 billion to support clean energy and address climate change, including \$8.8 billion in rebates for home energy efficiency and electrification projects.

These home energy rebate programs will help American households save money on energy bills, upgrade to clean energy equipment and improve energy efficiency, and reduce indoor and outdoor air pollution. DOE estimates that the historic home energy efficiency and electrification consumer rebates authorized will save households up to \$1 billion annually.

Today's launch also introduces Sparky, a Consumer's Best Friend, who guides online audiences through short explainers of various clean energy appliances and technologies that qualify for incentives in President Biden's Investing in America agenda. Throughout the coming weeks, DOE will add new educational videos that explain the basics of clean energy technologies, such as heat pumps, rooftop solar, electric vehicles, and more.

DOE's Energy Savings Hub also highlights a variety of low or no-cost DIY energy efficiency tips that can reduce energy usage and energy waste. Interested in learning more about new cost-saving incentives as they are updated on the Energy Savings Hub? Sign up for "The Current"--DOE's new consumer-focused outreach program. When you sign up, you will be the first to know about updates to incentive programs that can save you money

The Department of Energy recently launched its Energy Savings Hub, a one-stop shop for consumers to learn how they can take advantage of energy efficient technologies while also lowering their energy costs and saving money.

President Joe Biden is committed to intentionally and sustainably building America's clean energy economy. That means empowering everyday citizens to make the energy choices that best suit them, their families, and their businesses. With the help of the Energy Savings Hub, making clean energy switches is more affordable and easier than ever.

Lowering energy costs and keeping money in your pockets is something that concerns all Americans. Whether you are a homeowner or renter, the Energy Savings Hub has resources for you to save money and increase your home's energy efficiency. The Hub's toolkit can help you take the best care of your home and maximize your energy use.

## Energy savings hub 2023

Not only do electric vehicles (EVs) make use of cutting-edge technology, they also actively minimize our environmental impact. President Biden wants to make EVs more accessible to Americans through offering tax incentives for their purchase and constructing a nationwide network of EV chargers. Current and prospective EV owners can use the Hub to learn how these vehicles can save them money.

Are you wondering if you're eligible for a tax credit for installing new clean energy technology in your home? Look no further - the Energy Savings Hub has all the information to help you discover how you can save money just for being more energy efficient.

Another important feature of the Energy Savings Hub is our catalogue of different appliances, electric vehicles and home improvement measures. Each of these will increase your energy efficiency at an affordable cost. Click through different options to learn about them and see how they can help you save.

Sparky is a consumer's best friend! He can help you learn about emerging clean energy technologies that can better your home. Browse through our curated playlist to meet Sparky and dive deeper into new clean energy technology.
