

Energy storage for microgrids san salvador

Energy storage for microgrids san salvador

e-mesh(TM) Energy Storage range of modular and prefabricated battery energy storage solutions make faster, simpler and more efficient to integrate renewables and accelerate the transition to a more sustainable energy system, while complying with main grid codes and standards.

Covering a wide range of power ratings, from 250kW up to 100+ MW scale, it has been designed to provide grid stabilization with added energy storage benefits for installations across utilities, remote communities, independent power producers, oil & gas and mining companies, e-mobility and commercial and industrial facilities.

The e-mesh Energy Storage modular solutions are engineered, assembled and factory-tested by Hitachi Energy before delivery, ready for speedy and easy energization on-site while reducing site-based construction risks. The solutions can be tailored to meet specific needs and grid code requirements. They are scalable to allow easy upgrade or expansion and are replicable to enable fleet harmonization and reduce installed base complexity.

For more information, please download our brochure, or our different variants documentation: modular flyer (with PS1000 PCS), modular flyer (with EKS Energy PCS), and Modular Skidded solution flyer.
