

# Energy storage inverter 340 kWh

## Energy storage inverter 340 kWh

An Energy Storage Inverter (ESI) is an important electrical device that enables the conversion of electricity between a battery storage system and the grid or a connected load. Essentially, it is a specialized power inverter that is specifically designed to function seamlessly with a battery storage system, solar PV system, or other types of renewable energy sources. The main purpose of an ESI is to manage the flow of electricity between these different sources to ensure that energy is stored, distributed and utilized in the most efficient and cost-effective manner.

Yes, the latest version of the Hybrid G4 inverter has this feature, ensuring that the system will not operate until the battery is properly connected, thus improving safety and preventing damage to the system.

SolaX Energy Storage Inverter seamlessly integrates with various setups, providing unparalleled compatibility. Notably, it also supports retrofit installations, allowing for easy integration into existing systems. The versatile inverters offer a comprehensive range of solutions, including parallel operation, heat pump integration, microgrid connectivity, EV charger compatibility, generator support and VPP application.

SolaX Power Energy Storage Inverters offer multiple modes of operation, including Grid-tie, Grid-tie with battery backup, and Off-grid modes, giving customers flexibility and options.

**Affordable Prices:** SolaX Power Energy Storage Inverters are priced competitively, making them an affordable option for customers looking to invest in renewable energy.

The RI-ENERGYFLOW-MODULAR system is a family of modular hybrid inverters and battery storage units. This elegant energy storage solution is available with a choice of three single-phase hybrid inverters:-

Additionally, all DC power cable connections are concealed by the integral cable covers, which can only be accessed by use of a tool, for PAS63100:2024 compliance.
