

Energy storage investment trends serbia

Serbia currently gets more than 60% of its electricity from fossil fuels. The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year,...

Serbia offers significant investment potential for renewable energy integration and battery storage capacities to balance new renewable energy capacity on the grid. Here are key points highlighting the investment opportunities in these areas:

The Serbian government has called for the development of a spatial plan for six large-scale solar plants with a cumulative capacity of 1 GW that will be colocated with two-hour battery energy...

Serbia revised its Renewable Energy Law and conducted an inaugural auction for renewable energy. Serbia should adopt the final NECP in line with the Recommendations provided by the Secretariat. Ensuring energy security: Although the Gas Storage Regulation is yet to be transposed, Serbia fulfilled its storage targets. Serbia should transpose the ...

Recently, the Serbian government and EPS have announced ambitious plans to transition to green energy solutions and reduce Serbia's dependence on Russian natural gas. As a first step, in August 2023, the Serbian Government published a public call for a strategic partner to develop a 1 gigawatt (GW) solar PV power plant, together with a ...
