

Energy storage policy nuku alofa

Energy storage policy nuku alofa

Nuku'alofa, Tonga, May 17th, 2022 - Akuo, an independent global renewable energy power producer and developer, and Tonga Power Limited, the Tonga Islands' public grid operator, announce that they commissioned Tonga 1 & 2, the South Pacific's largest battery energy storage system with a total capacity of 29.2 MWh / 16.5 MW.

These two facilities have already had an opportunity to prove their resilience. Indeed, the volcanic eruption of January 15th, which resulted in a tsunami that devastated the archipelago's coastline and cut the country off from the rest of the world, did not affect their ability to function correctly, enabling these facilities to continue operating and help stabilize the grid in the days following the catastrophe.

The installation of these facilities was made possible by the "Tonga Renewable Energy Project" program, financed by the Green Climate Fund (56%), the Asian Development Bank (23%), the Tongan government (10%), Tonga Power Limited (6%) and the Australian government (5%).
