

Energy storage policy updates sao tome

In addition, UNDP is working with the government on a project that will build a cost-effective, clean electric, climate-resilient health system, which is critical for improved quality, efficiency, autonomy and management capacity. Furthermore, the project will contribute to energy security, eliminating the need to import high-cost fossil fuel to the healthcare system. The project consists of the installation of hybrid solar photovoltaic (PV) systems with solar PV generators and batteries in the country's 45 public-sector healthcare facilities.

Moving forward, the Partnership will continue to support S?o Tom? and Pr?ncipe in its ambitious climate action, mobilizing technical and financial resources for the implementation of its NDC Implementation Plan.

We greatly appreciate the commitment to the Partnership and the financial support for the Support Unit and the Partnership Action Fund (PAF) provided by our Development Partners: Belgium, Denmark, European Commission, Germany, Ireland, Netherlands, Norway, Sweden, and the United Kingdom.
