

# First solar south sudan

First solar south sudan

In 2013, we helped found SunGate Solar, a professional design, installation, and maintenance company committed to improving the standard of living and development of South Sudan through the delivery of sustainable energy for private, public, NGO, and commercial customers. SunGate Solar is owned and entirely staffed by South Sudanese.

In 2021, the Humanitarian Grand Challenges program funded our projects to address energy poverty in two new ways. SunGate Solar developed South Sudan's first solar mini-grid in the rural market town of Wanyjok. In parallel, Village Help for South Sudan conducted an electric cooking proof-of-concept project powered by the Wanyjok mini-grid. The project adapted South Sudanese cooking to electric pressure cookers. Read our final report on the pilot project [here](#).
