

Green energy suppliers for businesses

Green energy suppliers for businesses

Sustainability isn't just a part of our business, as a carbon-neutral company -- it is our entire business. Since 1997, we've been choosing a cleaner planet with the help of our customers. Whether your business is going green for the first time or taking its sustainability efforts to the next level, we can help you improve the environment with 100% clean, renewable commercial electricity.

Want to make a difference for your planet; your residents and your bottom line? Offering clean energy to your community can help set you apart as a green leader.

Inspire renters in your community to sign up and start making positive choices for the environment. Becoming a channel partner, along with other real estate customers, lets you offer pollution-free electricity to all of your apartment residents.

If you manage a restaurant, bar, lounge, coffee shop or other eatery, you might know a thing or two about tight margins, right? Reliable, affordable clean energy can help keep electricity bills in check while adding to your unique story and attracting patrons who value social responsibility.

Your school or university has the opportunity to educate entire generations about the importance of protecting the planet. Talk about powerful! By going green with renewable energy, you can deliver more genuine and effective messages about the environment, pollution and sustainability.

Whether you manage a hospital, doctor's or dentist's office, laboratory or other health care facility, you can show that you prioritize patient health both in and out of the office by embracing renewable energy. After all, the health of our environment affects public health.

Your customers want to spend their money at businesses that share their values. Attract more business and generate brand loyalty by using clean energy. From apparel and automotive to pets and cleaning supplies, clean energy is for everyone.

Want to differentiate yourself from the competition? Team up with our green experts to choose the best sustainable business electricity solutions for your factory, plant or facility. Dependable power for your equipment? Check. Satisfied customers? Check. An empowering message to share with your buyers and employees? Check and check! 100% clean, renewable energy offers it all.

Renewable energy works for all sizes and types of business. Whether it's a small, medium or large commercial setting, your business can benefit from choosing a more sustainable energy source. Government agencies can send a strong message about the future of renewable energy by using it daily; financial institutions can show they care about more than just the bottom line; hotels can promote sustainability

Green energy suppliers for businesses

practices as a selling point to travelers. It's a never-ending list, and we've saved a spot for your company on it.

As organisations strive to achieve net-zero emissions by transitioning away from fossil fuel-based power, they are intensifying their innovation efforts and diversifying their offerings to strengthen their renewable energy capabilities.

Canadian Solar specialises in the design and manufacturing of solar photovoltaic modules while offering comprehensive energy solutions. The company undertakes the management of solar power projects and provides operation and maintenance services. With a global reach, Canadian Solar serves customers spanning more than 160 countries.

Founded in 1997 and headquartered in Latham, New York, Plug Power has grown to become a significant player in the hydrogen fuel cell industry. The company has partnerships with major corporations such as Amazon, Walmart, and Home Depot, and its fuel cell technology is used in more than 40,000 vehicles worldwide.
