

Hybrid inverter 20kw

Hybrid inverter 20kw

Thanks to the smart monitoring platform, Deye full series inverter products support remotely shutdown immediately when accident occurs. Setting parameters and FW update remotely, which makes PV plant O&M easier.

The HYD 5K...20KTL-3PH is a 3-phase, multi-talented hybrid inverter for solar and storage applications. During grid-outages, it can provide up to 20 kW unbalanced 3-phase emergency power supply (EPS) within 10 ms through its integrated EPS-port.

The integrated energy management system has various user-friendly modes, optimizing the user experience, including an automatic self-use mode. The user can also set different time and/or date ranges or day of week rules.

All modes can be easily configured on the large LCD screen. Among others, this inverter is compatible with SOFARSOLAR's high-voltage energy storage systems: the GTX 3000-H and BTS battery system. A WiFi-stick is delivered with the inverter, to easily connect the inverter to the SOFAR View monitoring portal.
