

Infinity 1300 battery generator

Infinity 1300 battery generator

I have a vigorpool captain 1200, and 2 Ac180"s by bluetti. This unit has a much quieter fan, which makes it great for my bedroom. It also has plenty of power to back up my two tv"s, HEPA filter, mini fridge, game console, and computer at the same time. I wish I had known about this sooner, I would own 4 of them instead of the Bluetti"s and the Vigorpool.

Got this charging station right before a camping trip and it far exceeded my expectations! Was able to quickly charge all of our devices with it (phones, a laptop, lanterns, cameras, etc) as well as power a speaker and some string lights for many hours, and it still had power left over by the end of the trip. It"s also very portable and easy to maneuver with the handles. Very happy with this purchase and will be taking it on many trips in the future.

INFINITY 1300 lets you work anywhere and complete any project since its 1382Wh capacity and 1800W output are capable of powering even your heavy-duty devices. It"s perfect for off-grid living, camping, tailgate parties, emergency preparedness, and more.

With less than 20ms Switching Time, you never have to worry about losing power at home or losing progress on important work in the event of a power failure. Everything from lights in highly-used rooms and fridges to medical devices, computers, and more won"t fail.
