

Inkwenkwezi hybrid solar inverter 3kva

Inkwenkwezi hybrid solar inverter 3kva

This is a multi-function inverter/charger, combining functions of inverter, MPPT solar charger and battery charger to offer uninterruptible power support with portable size. Its comprehensive LCD display offers user-configurable and easy-accessible button operation such as battery charging current, AC/solar charger priority, and acceptable input voltage based on different applications

All inverters must be installed by a qualified electrical wireman or Master electrician with a valid registration with the Department of Labour. A valid electrical certificate of compliance (Coc) must be issued once installed, specific to the installation of the backup or solar system. The installation must be compliant with SANS 10142 and ALL its parts. Any warranty claim submitted without installation photos, a valid Coc and proof of a qualified wireman/master electrician installing the unit, can be rejected and will render the warranty claim null at void.

The Insele Inverter Systems are supplementary units to our Insele Solar range providing access to VAC power whilst utilising our reliable solar charging technology. The systems are intended as power back up systems for urban homes when the normal supply is interrupted or for use in RDP home for basic electricity access.

Tough, reliable and affordable the Insele Solar 3KVA 2400W Hybrid Inverter is ideal for battery backup and off-grid solar, home and office solutions. Transformer-less design provides reliable power conversion in a compact size with high efficiency. The 3KVA 2400W Hybrid Inverter has an aluminium housing and integrated interface system, these units are light and handy making installation easy and effortless.
