

Kuwait city solar pv

Kuwait has tendered a 1.1 GW solar project to supply electricity to the Ministry of Electricity, Water, and Renewable Energy under a 30-year power purchase agreement (PPA).

The Kuwait Authority for Partnership Projects (KAPP) has launched a tender to build a 1,100 MW solar project in Al-Shaqaya, Al-Jahra Governorate, near Kuwait City.

The KAAP said that project developers will have to hold at least a 15% stake in the submitted projects. Completion must be scheduled to be finalized within seven years from the conclusion of the tender.

The project is part of the Shagaya Renewable Energy Park, which consists of several renewable energy power plants, including wind, PV, concentrated solar power (CSP), and battery storage.

In a pivotal move towards sustainable energy, the Kuwait Authority for Partnership Projects (KAPP), in collaboration with the Ministry of Electricity & Water & Renewable Energy, initiates the qualification process for companies and consortia to participate in a tender. This tender aims to develop the Al Dibdibah Power and Al Shagaya Renewable Energy - Phase III - Zone 1 Solar PV Independent Power Producer (IPP) project, boasting a net capacity of 1,100 MW.

This significant step aligns with Kuwait's commitment to embracing clean energy and marks a strategic move towards reducing reliance on conventional power sources. The qualification process signals a new era for private sector involvement in Kuwait's renewable energy landscape.
