See current scrap price for Car/Truck Batteries as of November 22, 2024. Check 30-day price chart for Car/Truck Batteries and learn when to hold or sell your scrap metal. Price available for United States & Canada.

In Consumer Reports battery ratings, AGM batteries cost 40 to 100 percent more than traditional lead-acid batteries. The top batteries in almost all sizes are in the \$200 to \$300 range.

Looking for a place to get rid of your scrap Car or Truck batteries? Locate a scrap metal yard in your area for the most current and up to date scrap prices of car/truck batteries and other scrap metal. Car/Truck Batteries have a tendency of being very heavy and can be worth a good deal of money at your scrap yard. Be sure to check the labels to see if they are lead-acid batteries.

Scrap yards usually won't accept other types of batteries, as they are too difficult to scrap. On the iScrap App you can locate and contact scrap yards anywhere in your area and get the latest battery prices for your batteries for scrap. Scrap yards generally do not want lead batteries that are leaking or may have the potential to break open so they can maintain a safe working environment.

Battery recycling is always worth it, no matter the price. However, if you want to cash in on your scrap batteries, it is a good idea to understand why the prices fluctuate.

Knowing the reasons behind these ups and downs in the scrap battery market can help you make the best decision for your business when it comes to scrapping used batteries.

For example, over 70% of the weight of a lead acid battery is reusable lead! These metals can then be repurposed to make new batteries and other products. As a result, the price of scrap batteries depends on the price of the metals contained inside.

When we say recycling used batteries is worth it, we really mean it. It can make a difference in the environment but also save, if not make you, some money in the process.
