

Lg neon2 solar panels

Lg neon2 solar panels

LG utilizes responsive design to provide a convenient experience that conforms to your device's screen size. In order to get the best possible experience from our website, please follow below instructions.

If you're using Internet Explorer 9 or earlier, you will need to use an alternate browser such as Firefox or Chrome or upgrade to a newer version of Internet Explorer (IE10 or greater).

LG Solar is currently one of the leading solar manufacturers providing world-class, highly-efficient and affordable solar panels. Start saving on electricity bills in the long run with an LG Solar system. By choosing LG's long-lasting, energy-efficient and sustainable solar panels, you can receive higher financial and environmental benefits for your business and other stakeholders.

High-quality solar products are reliable, backed by great warranty programs and have longer lifecycles. For the latest solar panel models, LG is now providing 25-year warranty. This shows LG's confidence in developing highly efficient, durable and outstanding products.

LG's new module, NeON², adopts Cello technology. Cello technology replaces three busbars with 12 thin wires to enhance power output and reliability. NeON² demonstrates LG's efforts to increase value beyond efficiency. It features an enhanced 25-year warranty, durability, performance under real-world conditions, and a design suitable for roofs. LG NeON² has been exceeding the expectation of many—and has been recognized as the best-selling solar module in the market.

The LG NeON 2 LG400N2W-A5 is one of the most powerful and versatile modules on the market today. Featuring LG's Cello Technology in their monocrystalline n-type solar cells, the LG NeON 2 increases power output. Now includes a 25 product & performance warranty for higher performance and reliability.

LG NeON(R) 2 has been designed with aesthetics in mind using thinner wires that appear all black at a distance. The LG NeON(R) 2 can increase the aesthetic value of your property with a more modern design. These 72-cell modules are developed for commercial rooftops and ground mount solar panel systems.

NeON 2 solar modules were designed to provide the highest possible value for consumers who want to save money by going solar. As a result, LG designed modules that produce more power during the morning and evening hours and when some utilities charge more for the electricity you need. About half of U.S. investor-owned utilities currently have optional time varying rates for customers, and new programs are being tested in at least ten states. If your utility isn't charging time of use (TOU) rates now, it's possible they'll do so at some point during the lifetime of your solar system.
