Since 2010 we have been on a mission to change the way the world uses energy. We are committed to making a lasting impact on the earth by removing barriers to sustainable living and energy independence.

Renogy started as a small project by students at Louisiana State University. With the help and support of the Louisiana Business and Technology Center, Renogy has grown into a flourishing company.

Powered by an upgraded intelligent BMS circuit, the battery will provide balance between each battery cell group, and features the most precise temperature measurement discrepancy of its kind. This battery will more accurately display and protect the battery from over-voltage, under-voltage, over-current, short circuit, high temperature, and low temperature.

Regardless of the production, use, or scrap, it does not contain or produce any toxic and harmful heavy metal elements and substances such as lead, mercury, and cadmium. Renogy 100ah LiFePO<sub>4</sub> battery is made from 100% safe, nontoxic, and renewable energy.

Our LiFePO<sub>4</sub> battery is only a third of the weight of Lead Acid while providing a massive boost to performance and capacity so you won't miss a single second of runtime. Renogy's LiFePO<sub>4</sub> battery is your best choice for RVs, Marine and Off-Grid Applications when towing or mobility is in consideration.

The battery can be switched between active mode and shelf mode with the Activation Switch. Prior to long periods of storage, disconnect the battery from the system, connect the activation switch to the RS485 UP Communication Port of the battery, and long press the Power Button for 3 seconds to switch the battery to shelf mode.

With the improved RS485 UP Communication Port, your batteries will be able to communicate and transfer data in real time. Using a Renogy Bluetooth Module BT2 export the data into comprehensible information streamed straight to your handset, or watch it live with a Renogy monitoring screen.

## Lifepo4 lithium battery

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.

".. to the system I intend to put in my next RV, the cost is literally 50% cheaper. And, my current system Can't run the Microwave or the AC...." Read more
